PROJECTS

React/Node fragrance e-shop

Admin dashboard to upload and edit products and various features (discounts, images, sizes,etc). Checkout and payment flow (Mercado Pago). JWT authentication and Redux state management. Mongodb index search.

React/Node/Typescript Stagekeep (Band of Coders)

I developed the whole backend API and authentication system (with AWS Cognito, PostgreSQL and MongoDB), as well as parts of the frontend authentication UI.

https://rodrigohernanlopez.com.ar/

My portfolio, made with React. I used React-i18n to display the translations. Backend in Typescript includes a PostgreSQL/TypeORM database. Other tech: GeoIP-lite.

Task manager with React, Nodejs & MongoDb

Auth flow protected with JWT (access and refresh tokens) working along with Axios interceptors. State management implemented with useReducer/useContext hooks. Other tech: Cloudinary, multer, Geoip-lite.

WORK EXPERIENCE

Part-time full-stack developer at BandOfCoders
2022 - to present
Implemented backend (Node, Aws Cognito, Mongo and PostgreSQL) and frontend (React, Typescript) features according to the client's guidelines.
